SUMMARY

Data analyst with close to 2 years of experience building KPI dashboards, scalable reporting workflows, and self-service analytics across structured and unstructured datasets. Advanced in SQL, Python, Spark, Databricks, Snowflake, and AWS, with hands-on experience in Power BI and Tableau. Skilled in translating business requirements into metrics, dashboards, validation frameworks, and reporting workflows that improve decision-making.

EXPERIENCE

CRM Data Intern, Bread for the World, Remote **Feb 2026 - Present**

- Developed executive-facing Power BI dashboards and Excel reporting packs for financial and program operations, improving visibility into KPI trends, exception reporting, and business performance.
- Translated stakeholder reporting needs into reusable metrics, self-service reporting views, and scalable dashboard logic, reducing dependency on repeated ad hoc data pulls.
- Implemented SQL- and Python-based validation checks across structured datasets to improve reporting accuracy, strengthen metric definitions, and support audit-ready documentation.

Survey Data Insights & Analyst, Northern Virginia Families for Safe Streets **Feb 2026 - Present**

- Analyzed multi-source crash, survey, and administrative datasets across 5+ jurisdictions to identify performance trends, stakeholder engagement patterns, and operational improvement opportunities.
- Designed Power BI dashboards and visual reporting layers tracking 20+ KPIs, enabling leadership to compare segmented trends across time periods and geographies.
- Applied Python, SQL, and statistical analysis to analyze 5K+ records for decision support, surfacing insights that informed program strategy and policy discussions.
- Standardized recurring analytical workflows, reducing manual preparation time by 25% and improving consistency across stakeholder-facing outputs.

Data Analyst & API Intern, George Mason University **Aug 2025 – Dec 2025**

- Cleaned, integrated, and analyzed multi-source datasets using Python, SQL, and R, improving consistency and reliability across structured reporting and exploratory research workflows.
- Built repeatable analytical workflows with transformation logic, validation checks, and automated summaries, reducing manual processing time by 25% and improving reproducibility of research outputs.
- Developed stakeholder-ready dashboards, visualizations, and analytical summaries and strengthened downstream reporting trust by standardizing data documentation, quality checks, and workflow design

Data Analyst, Reliance Nippon Life Insurance Co. Ltd., Hyderabad, India **Sep 2022 – Dec 2023**

- Built and optimized SQL- and Python-based data workflows across large financial and operational datasets, reducing reporting turnaround time by 50% and enabling faster business insights.
- Developed a Python-SQL ingestion framework for high-volume daily source data, shrinking freshness lag from 24 hours to 90 minutes and supporting near–real-time reporting.
- Designed parameterized SQL models and automated Python validation checks that sustained 99.9% data accuracy while sharply reducing recurring schema and reporting defects.
- Supported scalable ETL workflows using Databricks, PySpark, and Delta Lake to process high-volume financial datasets, improving batch efficiency, incremental processing, and downstream data consistency.

EDUCATION

George Mason University Master's, Data Analytics Engineering, GPA: 3.90/4.0 **Jan. 2024 – Dec. 2025**

Jawaharlal Nehru Technological University (JNTU) Bachelor's, Civil Engineering, GPA: 2.9/4.0 **June 2019 - May 2022**

SKILLS

Programming and Processing: SQL, Python, R, Spark, PySpark, Pandas, NumPy, scikit-learn, Git, JupyterLab, Bash

Databases and Cloud: Snowflake, AWS (S3, Redshift, Athena, Glue), Google BigQuery, Microsoft SQL Server, PostgreSQL, MongoDB, Google Cloud Platform, Databricks (Delta Lake, Spark SQL, Notebooks)

Analytics and BI: Power BI, Tableau, Excel, KPI Design, Data Visualization, Self-Service Reporting

Data Management and Governance: Metadata, Data Lineage, Business Definitions, Data Quality Validation, Access Governance, Audit-Ready Documentation

Methods: Exploratory Analysis, Trend Analysis, Forecasting, A/B Testing, Regression, Classification, Clustering, Time Series
